CAN LINERS TO FIT YOUR WASTE

The right fit makes all the difference when controlling trash. Keep clutter in your can with the precise fit.

Using Special Tape Measure to find a can's gallon size:

Step 1: Wrap the Can Sizing Tape Measure around the top - just below the lip of the receptacle.

Step 2: Drop the rest of the tape measure down the side of the receptacle. The bottom reading on the Can Sizing Tape Measure specifies the size of the receptacle.

Step 1:

Step 2:

RESIN TYPES

Linear Low-Density Polyethylene Bags (LLDPE)

Use Linear Low-Density Bags for rough or sharp objects under tough transport conditions. These very strong bags are more resistant to tearing but handle lower load capacities than HDPE bags.

Suggested applications:

- Plastic utensils and food with rough edges
- Sticks, yard trimmings and glass
- Metal with sharp edges

High-Density Polyethylene Bags (HDPE)

Use High-Density Bags for paper and non-rough objects under moderate transport conditions. These very strong bags handle higher load capacities than LLDPE bags but tear easier once punctured.

Suggested applications:

- Cans and food without sharp edges
- Grass, rags and smooth heavy objects
- Paper plates, cups, towels and office supplies

Contact your account manager to request the Can Sizing Tape Measure
